

RAUSHIK GUPTA

+91-7366012737 | raushik.gc.06@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

TECHNICAL SKILLS

Programming Languages: C++, JavaScript, Java

Full Stack Development: React, HTML, CSS, Tailwind, Node.js, Express.js

Database Management: MongoDB, MySQL, PostgreSQL, Supabase

Developer Tools: Git, GitHub, Postman(API Testing)

3D Design Tools: Fusion 360, Blender

Languages: English(Fluent), Hindi(Native), Japanese(Beginner)

EDUCATION

VIT Bhopal University

2023 – 2027

B.Tech in Computer Science and Engineering

CGPA: 9.06

CERTIFICATIONS & JOB SIMULATION

AWS Technical Essentials - AWS Academy

The Bits and Bytes of Computer Networking - Google

Cloud Platform Job Simulation - Verizon

Software Engineering Job Simulation - Hewlett Packard Enterprise

PROJECTS

PulseSeat - High Throughput Ticket Booking Engine — [GitHub](#) — [Live](#) April 26 - Aug 2026

Next.js, TypeScript, Node.js, Fastify, Supabase, Redis, Prisma, Tailwind CSS, Docker, k6

- Engineered a high-throughput ticketing backend using Node.js (Fastify) and PostgreSQL, completely eliminating race conditions and double-booking bugs by implementing strict pessimistic row-locking (SELECT FOR UPDATE) inside ACID transactions.
- Reduced core database load by 40(%) during peak traffic spikes by deploying an in-memory Redis Rate Limiter, blocking automated brute-force bot requests at the caching layer.
- Validated system stability up to 1,000+ concurrent requests per second by executing rigorous stress tests utilizing Artillery.io, achieving a 0(%) ticket over-allocation error rate.

MahaMove AI — [GitHub](#) — [Live](#)

June 2026

Next.js, TypeScript, Tailwind CSS, Supabase, Leaflet, Recharts

- Architected MahaMove AI, an AI-powered transportation and mobility management platform for the Mahakumbh **Hackathon** to address large-scale crowd congestion and optimize urban mobility.
- Engineered **route planning**, smart parking recommendations, **congestion prediction**, **crowd heatmaps**, and AI-driven operational insights to enable real-time traffic monitoring and decision-making.
- Delivered a scalable end-to-end prototype demonstrating AI-driven mobility optimization and efficient crowd management for high-density public events.

INTERNSHIP EXPERIENCE

TechToGreen Drone and Robotics Pvt Ltd.

Apr 2025 – May 2025

Product Design and Prototyping Intern

Andhra Pradesh, India(On-site)

- Gained hands-on experience with Raspberry Pi, Robot Operating System (ROS), and RPLiDAR for short-term internal R&D projects.
- Designed and animated **10+** product prototypes using Fusion 360 and Blender for client demos and internal presentations.

MPOnline Ltd.

May 2026 – Jul 2026

Virtual Internship Program

Madhya Pradesh, India(Remote)

- Developed a full-stack application, working across backend development, database integration, business logic, CRUD operations, and unit testing.
